CLAIM AMENDMENTS

1. (Currently Amended) A method for providing particularized billing services, the method comprising the steps of:

selecting a client for whom a bill is to be produced, and performing the following operations within a local, expanded, or global computing environment;

extracting a list of software objects <u>from a library of objects</u>, each <u>object being operative to</u> <u>generate having</u> a predefined bill format with specific fields for the selected client or clients in the market segment to which the client belongs;

invoking at least one of the software objects to collect data pertinent to the client and to the specific fields in the bill format; and

producing the bill having the defined bill format, with the data collected for the selected client in the appropriate fields.

- 2. (Currently Amended) The method of claim 1, wherein a portion of the collected data is correlated to more than one of the specific fields field in the bill format.
- 3. (Currently Amended) The method of claim 1, wherein the <u>collected</u> correlated data further comprises detailed information pertinent to a billing account of the client.
- 4. (Currently Amended) The method of claim 3, further comprising the step of segmenting the detailed information into different portions of the bill bills.
 - 5. 7. (Canceled)
